

SOURAV GOKUL V

Frontend Developer — React.js — Next.js — TypeScript

☎ +91 95669 43359 | ✉ souravgokul4@gmail.com | [in LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Frontend Developer with 1.7+ years of experience developing production-grade web applications with React.js, Next.js, and TypeScript. Skilled in building scalable component architectures, integrating REST APIs, implementing SSR, and optimizing frontend performance across responsive applications. Experienced in developing LMS, e-commerce, and real-time WebRTC platforms, including an SFU-based live-class system supporting 250+ concurrent participants. Focused on building maintainable, high-performance user interfaces and reliable real-time experiences.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & UI	React.js, Next.js (SSR), Tailwind CSS
State & Data	TanStack Query, REST API integration
Real-time & Media	WebRTC, LiveKit, Socket.IO, HLS video streaming
Testing	LiveKit load testing (1,000 simulated participants), end-to-end media testing
Concepts	SSR, Code Splitting, Lazy Loading, RBAC, Component Architecture, Performance Optimization, State Management, Custom Hooks
Tools	Git, GitHub, @dnd-kit, Figma

EXPERIENCE

Frontend Developer — Aim Window Info Tech, Bengaluru, India

Feb 2025 – Present

- Own frontend delivery across three production platforms — an LMS, a WebRTC live-class system, and an e-commerce storefront — from component architecture through performance tuning and release.
- Built a shared component library of 50+ reusable React components (forms, tables, modals, data grids) adopted across all three platforms, reducing per-feature UI development time and standardising patterns across the team.
- Integrated 50+ REST API endpoints, partnering with backend engineers to define API contracts, debug integration issues, and optimise data-fetching and caching strategies with TanStack Query.
- Translated Figma designs into responsive production interfaces with Tailwind CSS across mobile and desktop breakpoints — awarded the Future UX Star Award for UI quality.

KEY PROJECTS

WebRTC Live-Class Platform

React.js, LiveKit (WebRTC SFU), STUN/TURN, Socket.IO, HMAC authentication

- Built the live-class client on a LiveKit SFU media pipeline with STUN/TURN traversal for restrictive networks, supporting 250+ concurrent participants per room.
- Validated performance with LiveKit's official load-testing and end-to-end media test tools at 1,000 simulated participants, confirming audio/video delivery under load before production rollout.
- Implemented HMAC-signed join tokens and one-time entry links for secure, non-replayable class access, plus participant management and automatic Zoom/WebRTC routing by meeting type.

Learning Management System (LMS)

React.js, Next.js, HLS.js, REST APIs, RBAC

- Delivered role-based interfaces for admin, instructor and student roles across course, lesson and enrolment management, serving 1k+ learners across 15+ courses.
- Integrated HLS video streaming with chapter-based lesson navigation, and built an interactive quiz engine with instant answer validation and progress tracking.

E-Commerce Platform

Next.js, SSR, CCAvenue, Tailwind CSS, SEO

- Built a customer-facing storefront supporting 10k+ product listings with SSR product pages, cart, checkout and CCAvenue payment gateway integration.
- SSR implementation raised the Google Lighthouse score from 10 to 80 and cut initial load time by 50%, improving organic search visibility.
- Developed the admin panel for inventory management and full order-lifecycle tracking.

EDUCATION

B.Sc. Software Systems — Kongu Engineering College, Tamil Nadu, India

2019 – 2022

CERTIFICATIONS

- MERN Stack Development — Besant Technologies, Bengaluru
